Give yourself the advantage with binoculars designed to actually help you find game, not just see it. With the Predator's high-contrast, game-sensing lenses, you'll discover hidden wildlife before others even know where to look.

PREDATOR®

PREDATOR ULTRA-LIGHT

Two compact and extremely lightweight models that are ready to take anywhere.

NEW

10x26 PREDATOR PRO

With higher magnification and a larger objective lens, the 10x26 Predator Pro provides high power and excellent light transmission with the new PCS game-sensing lenses. All this performance in a package that fits into a shirt pocket.

The perfect choice for bowhunters or hunters on the move the 10x26 is a binocular that delivers all day, but won't get in the way. The new body design with its enlarged center focus improves handling, especially in wet conditions.

It features wrap-around eye cups, is water resistant and fogproof. Includes deluxe case and strap. 10-year limited warranty.

10x26 - Item no. 236 Weight: 12.3 oz
Field of view: 289 feet @ 1000 yards
Eye relief: 11 mm

NEW

8x22 PREDATOR PRO

Small in size, light in weight, with the ability to spot game in all terrain make these the ideal choice for treks in the forest and heavily foliated brush.

We developed the all new body design with dedicated hunters in mind. It substantially increases handling comfort in all weather conditions, especially wet conditions or when wearing gloves. The 8x22 Predator Pro weighs only a few ounces and folds easily into a pocket or its own small case. The new PCS coating delivers the clarity and brightness you'd expect from larger binoculars. Includes deluxe case and strap. 10-year limited warranty.

8x22 - Item no. 234 Weight: 10 oz
Field of view: 369 feet @ 1000 yards
Eye relief: 10 mm

Nothing escapes these eyes. Game enhancing, high contrast Predator optics give wildlife no place to hide.

Predator High Contrast lenses help you spot hidden game by blocking the colors of haze and foliage, enhancing the visibility of browns, reds and other wildlife colors.

Choose from models designed to meet your special needs, from the thickest cover to hill country, or in poor light or sunshine scattered through tree tops. Wherever and however you need to spot in cover, the Predator's eyes will give you the edge you need.

PREDATOR

PREDATOR SPORTS AUTO-FOCUS

Steiner's 8x30 Predator and new 10x40 Predator Pro feature the Sports Auto-Focus System, sharp from about 20 yards out to infinite distance with little or no readjustment needed. This is especially important in low light, heavy timber or brush when exact distances are uncertain. Everything in your viewing field will be focused sharply."

NEW 10x40 PREDATOR PRO

The 10 x 40 Predator Pro features Steiner's exclusive Color Adjusted Transmission (CAT) lens coating that enhances brown and red colors against foliated backgrounds, making game subjects "pop" from their woodland environs. Incorporating emerging lens technology and new coating systems, 10 x 40 Predator Pro offers markedly brighter and crisper images, enhancing the binocular's effectiveness at dusk and dawn, or in poor weather or low light conditions. 10-year limited warranty.

10 x 40 - Item no. 214

Weight: 24 oz

Field of view: 273 feet @ 1000 yards

Eye relief: 18.5 mm

Limited Time Binocular Harness Offer

Purchase the new 10 x 40 Predator Pro and receive a Steiner binocular harness for added comfort. Keeps the binocular close when hiking or stalking.

8x30 PREDATOR

The versatile Predator 8 x 30 is small enough to carry easily and fit into a coat pocket, while offering both power and brightness. It's the choice for those who need the Predator's defolating edge in the widest variety of outdoor environments, from woodlands to open fields. Set the Sports Auto-Focus for yourself and everything will appear clearly, a tremendous advantage in heavy cover. 10-year limited warranty.

8 x 30 - Item no. 286

Weight: 18 oz

Field of view: 360 feet @ 1000 yards

Eye relief: 20 mm

Suddenly your eyes see what you've been waiting for. The phase corrected Predator Premier Selection roof prism binoculars are brighter and offer higher resolution and contrast. You'll appreciate the light weight and ease of handling, making the Predators comfortable for hours of glassing.

PREDATOR®

PREDATOR PREMIER SELECTION

With Steiner's CAT (Color Adjusted Transmission) high contrast lenses, penetration into deep, dark foliage is now possible. The lenses have been specially tuned to enhance brown and red colors.

10x42 PREDATOR

When you need maximum optical performance to spot wildlife in woodlands and brush under all lighting and weather conditions, consider the 10 x 42 Predator. The 10 x 42 provides high power, long eye-relief and maximum contrast for quick and easy viewing of wildlife. Designed with experienced hunters, these binoculars combine the brightness of Steiner's best phase coated "CAT" optics and the game sensing Predator lenses to let you find hidden wildlife under nearly impossible conditions. Mil spec waterproof and shockproof, the Predators will be the last binoculars you will ever need. An excellent choice for all hunting applications.

10 x 42 - Item no. 258
Field of view: 295 feet @ 1000 yards

Weight: 25 oz
Eye relief: 20 mm

8x42 PREDATOR

Designed for all around work, the 8 x 42 Predator provides a wider field of view than the 10 x 42 with the same brilliant game-sensing lenses that have made the Predator one of the best hunting binoculars available. A great choice for birders and all types of small and big game hunting under a wide range of conditions.

Birders will enjoy incredible close focus and outstanding brightness. With its center focus, lightweight body and mil spec waterproof design, the 8 x 42 provides reliable and trouble free use all day, every day. The 8 x 42 has long eye-relief for eye-glass users and features Steiner's phase coated Predator optics. Includes a newly designed rainguard which attaches to the clip-in contoured neoprene comfort strap. 30-year limited warranty.

8 x 42 - Item no. 248
Field of view: 387 feet @ 1000 yards

Weight: 24 oz
Eye relief: 20 mm

When scanning a wooded area with the Steiner Predator animals seem to "pop out" against scenery.

The exceptionally bright, phase-corrected binoculars are equipped with Steiner's High-Contrast "CAT" lens coating system that helps make wildlife detection much easier for the human eyes. By filtering out background greenery and foliage and enhancing the visibility of browns, reds and other wildlife colors, the coating helps users detect distant images even against well-camouflaged backgrounds.

PREDATOR

PREDATOR PREMIER SELECTION

Steiner's 10x50 and 12x50 Predator will add considerable brightness, while maintaining the highest levels of contrast, without sacrificing light-weight and portability.

10x50 PREDATOR

With its 5 mm exit pupil and fully-multi coated lenses the 10 x 50 Predators provide excellent light transmission, high power and a generous field of view. These Predators are fully multi-coated with Steiner's high contrast CAT Predator coating and are phase corrected for distortion free images. Weighing in at only 28.5 ounces the 10 x 50 Predator is easy to carry all day with its extra wide non-slip neoprene carry strap. 30-year limited warranty.

10 x 50 - Item no. 266 Weight: 28.5 oz
Field of view: 261 feet @ 1000 yards Eye relief: 20 mm

High contrast, super bright, game-sensing lenses bring out the most detail and allow fast identification of wildlife.

12x50 PREDATOR

The 12 x 50 is the perfect choice for long range viewing under all light conditions in open country. With its wide field of view, 29 ounce weight and 20 mm eye relief the new 12 x 50 Predator is easy and comfortable to use for hours at a time. Included with both models is a very user-friendly deluxe custom molded case that will protect your binoculars for years to come.

12 x 50 - Item no. 268 Weight: 29 oz
Field of view: 210 feet @ 1000 yards Eye relief: 20 mm
